RUSS NORDSTROM
DIRECTOR

February 14, 2006

Nebraska Department of Motor
Vehicles
PO Box 94789
Lincoln, NE 68509-4789

Dear Sir or Madam:

Please be advised that Oklahoma began issuing a redesigned certificate of title for vehicles, vessels and outboard motors in January 2006. Enclosed for your review are samples of our different title types. The significant changes reflected in the new design are as follows:

- The size of the title certificate has been increased to 8.5" x 11", with an additional 3" tear off tab (see below)
- The first ownership assignment has been relocated to the bottom front of the certificate. Dealer reassignments, as well as a lienholder information section, remain on the reverse side.
- A 3" tear off tab is now included on every certificate. For vehicle titles, the tab is an (optional) notice of transfer of ownership which may be completed and submitted to our office by the seller. For vessel and outboard motor titles, the tear off tab contains pertinent titling/registration information.

Please note that we will not be reissuing or replacing existing Oklahoma title certificates. The old designs will remain in circulation, until and unless replacement titles are individually applied for and issued. We ask that you continue to honor both old and new certificate of title designs.

We hope you find this information useful. Please direct any questions or concerns to Joe Lunn at (405) 521-3101, or email *jlunn@tax.ok.gov*, or Chuck Dusenbery at (405)521-3538, or email *cdusenbery@tax.ok.gov*.

Sincerely,

Russ Nordstrom, Director
Motor Vehicle Division
Oklahoma Tax Commission

## Things to Look For

### Eagle Watermark Paper and Thread

The certificate is printed on a mould-made Eagle watermark paper. To view the watermark, hold the sheet between you and a light source. There is also an embedded thread running the full length of the certificate.

### Full Chemical Sensitivity

The certificate is printed on a full chemical sensitive paper so that it will react to the five families of falsifying agents. Any attempt to alter the document will be apparent.

### Microprinting

Microprinting is used on the face of the title just along the bottom border. Letters are applied in a continuous tone and to the unaided eye it appears to be a solid line, but with magnification of 8X or more you will be able to authenticate.

### Toner Anchorage

The face of the Certificate of Title is treated with a coating to allow the toner to adhere to the sheet.

### Prismatic Printing

The face and back of the Certificate of Title has a pantograph pattern using two colors of ink from a single press unit. The process blends the colors together vertically.

### Color Photocopy Protection

The hidden word "VOID" will be visible on most color copiers. The background colors on the Certificate of Title blend together vertically within the pantograph pattern.

### Fluorescent Control Numbers

The consecutive control number printed on the face of each Certificate of Title is printed with an ink that will fluoresce under an ultraviolet light.

### Latent Image

There are latent images located in the upper left (T) and upper right (C) corners, these images can be viewed under magnification.
